Lyulin 11, 2230, Kostinbrod, Bulgaria

About me: After more than ten years spent in the automobile engineering and the telematics fields I have come to the decision to head to a new challenge. The spring of 2019 was the moment I started learning Software engineering with SoftUni. In these years I was able to get into the .NET world. Now I feel ready to make my first steps into the professional IT field. As a person who knows what his aims are and how to achieve them with hard work and analytical thinking, I am eager to dive deep into the vast universe of technologies. I believe I am the right person who will surely become a plausible member of every team in the field desired. I do truly believe that the working atmosphere has built up calm, creative and responsive character traits. Due to these I have gained the abilities to make tough decisions, work out dynamic situations and cope with every possible issue. The fact that I have not changed my employer for twelve years proves that I am faithful and valuable for the team.

● EDUCATION AND TRAINING

05/2019 – CURRENT – Sofia, Bulgaria

SOFTWARE DEVELOPER – SoftUni

In this time I acquired the following knowledge:

- Object-Oriented Programming in C#
- Databases - MS SQL Server
