

Pavlin Stoyanov

Junior Software Developer

After more than ten years spent in the automobile engineering and the telematics fields I have come to the decision to head to a new challenge. The spring of 2019 was the moment I started learning Software engineering with SoftUni. Now I feel ready to make my first steps into the professional IT field. As I person who knows what his aims are and how to achieve them with hard work and analytical thinking, I am eager to dive deep into the vast universe of technologies.

WORK EXPERIENCE

Telematic devices Installer Viasat Technology

09/2007 - Present

Sofia, Bulgaria

automobile engineering and the telematics fields

Achievements/Tasks

- My task is to instal telematic devices to all kinds of vehicle. I Should remove parts from vehicle's interior, then should find power supply and all nessassary signals(Fuel level, CAN Data, Ignition on, Ignition blocked, ect), and finaly I connect device to them and return all removed parts in ther placee.
